

Novagard Solutions has been awarded the **Rural Builder Gold Key of Excellence Award for 2015** by the 29,000 readers of *Rural Builder* magazine, for our Novaflex Metal Roof Sealant.

The annual Gold key Award recognizes the elite in our industry. Hundreds of companies qualify through nominations, but only the top 10 percent annually receive the honor. This is the 33rd year for **Rural Builder Gold Key Awards**. For more than three decades rural builders have voted for their favorite suppliers in the industry. Through a ballot process, they select companies based on six criteria: quality of customer service, on-time delivery, product quality, warranty procedures, pricing and no surprises between what is expected and what is delivered.

We are happy to be selected for this respected award and to be included in such an exclusive group representing the rural building industry. Novagard Solutions continues to be a leading edge company that provides innovation, high quality and customized products while delivering consistency and reliability to our customers. Our goal is always to provide our customers with excellent service and products!
