

For immediate release

Novagard Solutions and Louis T. Ollesheimer & Son have announced today a partnership for the supply of NOVAFLEX® Metal Roof Sealant for customers served by Louis T. Ollesheimer & Son's 10 locations operated in 4 states.

CLEVELAND, OH and MADISON HEIGHTS, MI, December 13th, 2011 – Novagard Solutions™, Inc. a leading supplier of engineered chemical products serving the needs of the metal roof, window, door, siding and gutter dealers, building material wholesalers and contractors along with Louis T. Ollesheimer & Son, Inc.™, a building material supplier that carries roofing materials and equipment for the residential and commercial roofing contractor, have announced that NOVAFLEX® Metal Roof Sealant, used in commercial and residential metal roofing applications, is now available through the ten Ollesheimer locations operated in Indiana, Michigan, Ohio and West Virginia

NOVAFLEX® Metal Roof Sealant offers superior product performance compared to traditional roof sealants. The product is solvent free (100% solids), is V.O.C. compliant meeting CARB and OTC regulations, easily gunned at all temperatures and easy to cleanup making this product universally liked by contractors in northern and southern climates. The product offers industry leading weatherability and UV resistance and is mold/mildew resistant. NOVAFLEX's® plastic tubes and exclusive Tip Kits eliminate headaches for distributors and contractors alike with easily applied tips for gunning the sealant and sealing caps to protect the sealant for use at a later time.

Testing of NOVAFLEX® silicone Metal Roof Sealant demonstrates that it offers improved benefits of superior UV resistance, superior weatherability, outstanding adhesion to Kynar® coated metal roof substrates, a tack free time less than 15 minutes, total cure in as little as 24 hours and has shrinkage on cure of 1 to 4%. It extrudes easily down to 0° F, is mildew resistant and has been shown to offer superior adhesion to Kynar® coated metal, steel and aluminum metal roof substrates than traditional roofing sealants. The combined effect of these features offers metal roof installation or metal roof repair applications with a superior technology sealant adhesive system and for the contractor offers superior ease of use and cleanup.

Novagard Solutions™, Inc. and Louis T. Ollesheimer & Son, Inc.™ have joined forces to create a powerful regional program to supply and service all of Ollesheimer's distributor locations in Indiana, Ohio, Michigan and West Virginia with the recently introduced NOVAFLEX® Metal Roof Sealant.

"For more than 30 years, Novagard Solutions™ has been developing new engineered products for all types of applications in the construction industry, including window & door, trim, siding, gutter and metal roof applications, and this product offers an exciting new entry to our product offerings", said

Michael S. Sylvester – Founder and CEO. “The motto, Engineered Products...Innovative Thinking, further expresses our goal of providing not only products, but solutions to our valued customers. We are registered to ISO 9001:2000 and ISO/TS 16949:2002.”
