

"We've tried every product. Novaflex is the best."

John Barbera, President, Barbera Home Improvement

Careful workmanship and insistence on using the best materials have helped Barbera Home Improvement grow from a family startup to a 60-employee contracting business. And Novaflex® Metal Roof Sealant has been a part of their success.

"Since we started using Novaflex, we've had not one call back on flashing," said President John Barbera. Novaflex provides superior flexibility and adhesion to metal, coated metals, wood, masonry, PVC and most common construction materials.

"Novaflex is contractor-friendly," said John. "When flashing you need to be able to finger trowel and you can with Novaflex. It sticks even when it's damp outside, and it's easy to clean." Novaflex extrudes down to 0°F, becoming tack-free in 10 minutes and completely cured in 24 to 48 hours.

"We've been using Novaflex for two years now and those first applications look as good today as the day we did them," said John. "Novaflex is what we use exclusively."
